

EQUITY INVESTMENT CORPORATION

MID-CAP VALUE SMA

Value | Quality | Growth

Data as of June 30, 2017

WHAT MAKES EQUITY INVESTMENT CORPORATION (EIC) DIFFERENT:

- Not “benchmark-centric”
- Focused on absolute vs. relative returns
- Goal is to maximize the investor’s odds of success

INVESTMENT STRATEGY

Founded in 1986, EIC implements a value discipline to investing, believing the key to long-term investment success is avoiding significant losses. EIC looks for high quality companies selling below their value as ongoing businesses. This has led to lower volatility and an approach we believe is also more tax efficient. To that end, we use a highly disciplined investment process that helps identify and avoid value traps. Our culture of independent thinking provides the flexibility to invest where value leads, regardless of capitalization size.

EIC Mid-Cap Value SMA (MCV SMA) 60-MONTH ROLLING RETURN

	Rolling Periods	Negative Returns	Positive Returns	Minimum Return	Maximum Return	Average Return
EIC MCV SMA Gross	103	1	102	-1.1%	24.8%	10.8%
EIC MCV SMA Net 3%	103	5	98	-4.0%	21.2%	7.5%
Russell Midcap® Value Index	103	8	95	-5.4%	28.1%	8.7%
S&P 500® Index	103	15	88	-6.6%	23.0%	7.4%

This graph illustrates EIC’s returns relative to its benchmark index in the 103 rolling 60-month periods from the inception of the Mid-Cap Value SMA (MCV SMA) Composite (January 1, 2004) through June 30, 2017. Gross returns are before all fees and transaction costs; net results are simulated by reducing gross returns by an annual fee of 3%. Please see the full disclosure presentation attached for details. Indices are unmanaged, do not incur management fees, costs and expenses, and cannot be invested in directly.

HYPOTHETICAL GROWTH OF \$100,000 SINCE INCEPTION

Growth of \$100,000 assumes that amount invested January 1st, 2004 grows by monthly reinvesting in EIC's strategy (or the index) through June 30, 2017. EIC's Growth of \$100,000 is that of EIC's Mid-Cap Value SMA (MCV SMA) Composite before all fees and after a hypothetical maximum 3% per year SMA fee. Client's return will be reduced by advisory and other expenses the client may incur. Indices are unmanaged, do not incur management fees, costs and expenses, and cannot be invested in directly. Dollar figures are rounded to the nearest thousand.

This portfolio and performance information is provided as supplemental to a full disclosure presentation.

¹Sector weights may not equal 100% because of rounding conventions. ²The securities identified and described do not represent all of the securities purchased, sold or recommended for client accounts. Actual portfolio holdings may vary for each client and there is no guarantee that a particular client's account will hold any, or all, of the securities identified. The reader should not assume that an investment in the securities identified was or will be profitable. ³Characteristics calculated from a representative Mid-Cap Value account using Morningstar DirectSM software. ⁴EIC's results (which include reinvestment of dividends and interest earned on cash) are through June 30, 2017, and represent returns for EIC's Mid-Cap Value SMA (MCV SMA) composite, presented gross of all fees and net of a hypothetical maximum fee of 3% per year. Indices are unmanaged, do not incur management fees, costs and expenses, and cannot be invested in directly. Periods greater than one year are annualized. ⁵All characteristics are since inception. Standard Deviation is of rolling-12 month returns. Beta is a measure of the portfolio's volatility relative to the benchmark, the Russell Midcap® Value Index. Upside and Downside Capture are the measures of performance in up and down markets relative to the benchmark index. The higher the upside capture, the better the performance in a rising market. Conversely, the lower the downside capture, the better the performance in a declining market. Tracking Error is the amount by which the performance of the strategy differed from that of the benchmark over the time period. **13 ½ years (since Jan. 1, 2004). Results are historical and do not imply future rates of return or volatility for EIC or the indices, which may be materially different from the past and from one another. Verification reports, along with a complete list of EIC's composites, are available upon request.

Mid-Cap Value SMA Composite Performance Description

Equity Investment Corporation (EIC) is an SEC registered independent investment advisor incorporated in the state of Georgia. Effective September 30, 2016, assets of the firm transferred from Jim Barksdale, who founded the firm in 1986, to three members of the investment team who collectively have more than 40 years of experience at EIC. Accounts continue to be managed using the same investment process. Performance numbers are the value-weighted, time-weighted, total return composite results of fully discretionary Mid-Cap Value wrap (SMA) accounts. The strategy invests in high quality, well managed mid-cap companies, while at the same time avoiding those that look inexpensive relative to their historical record but are actually in structural decline. Prior to January 1, 2013, the composite was called the Mid-Cap Value Wrap Composite. Returns are generally presented net of foreign withholding taxes on dividends, interest income, and capital gains; however, returns for some accounts are presented gross of foreign taxes depending on the treatment by their custodian. All accounts included in the composite are managed according to similar investment guidelines. The composite creation date is January 1, 2004, and SMA accounts comprise 100% of the composite. SMA accounts pay an all-inclusive fee based on a percentage of assets under management. Other than brokerage commissions, this fee includes portfolio monitoring, consulting services, and in some cases, custodial fees. Performance includes reinvestment of dividends, and EIC's returns also include interest earned on cash. The benchmark index is the Russell Midcap® Value Index (which excludes an advisory fee), and was chosen because it is representative of the composite's investment style. The Russell Midcap® Value Index measures the performance of mid-cap companies with lower price-to-book ratios and lower forecasted growth rates. It is a subset of the Russell Midcap® Index which consists of approximately 800 stocks and represents the mid-cap segment of the US equity universe.

*"Total Assets" include our regulatory assets under management ("GIPS® Firm Assets") and our advisory-only "UMA Assets". EIC has no trading discretion for UMA accounts and provides a model portfolio to the program sponsor or overlay manager. The "UMA Assets" and "Total Assets" amounts are shown as supplemental information.

¹ Dispersion is an asset-weighted standard deviation for the accounts in the composite for the entire year (or year to date).

² Results include SMA accounts and gross returns are shown as supplemental information. Gross returns for SMA accounts are stated gross of all fees and transactions costs; net returns are simulated by reducing gross returns of the composite by an annual SMA fee of 3% (0.25%/month).

N/A – Information is not statistically meaningful due to an insufficient number of portfolios in the composite for the entire year.

Additional Notes: The three year annualized standard deviation measures variability of the composite and the benchmark returns over the preceding 36 month period.

Mid-Cap Value SMA Composite Performance Description (*cont'd*)

Performance has been measured on a monthly basis from January 1, 2004, to present. Periods are geometrically linked to obtain the quarterly and annual results. Eligible new accounts are added to the composite at the beginning of the first full quarter under EIC management. Trade date accounting with monthly valuations and adjustments for large cash flows are used. Results are based on fully discretionary accounts under management, including those accounts no longer with the firm. The US Dollar is the currency used to express performance. Returns include the reinvestment of all income. There are no non-fee paying accounts. Economic and market conditions have differed over the time period displayed, and likewise will be different in the future. Policies for valuing portfolios, calculating performance and preparing compliant presentations are available upon request.

Equity Investment Corporation (EIC) claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS® standards. EIC has been independently verified for the periods January 1, 1986, through March 31, 2017. Verification assesses whether (1) the firm has complied with all the composite construction requirements of the GIPS® standards on a firm-wide basis and (2) the firm's policies and procedures are designed to calculate and present performance in compliance with the GIPS® standards. Verification does not ensure the accuracy of any specific composite presentation. The verification reports, as well as a complete list and description of all the firm's composites, are available upon request by contacting Equity Investment Corporation, 3007 Piedmont Road NE, Suite 200, Atlanta, GA 30305. Prospective clients should be aware that results are historical and do not imply future rates of return or volatility for EIC or the indices, which may be materially different from the past and from each other.

Investment management fees are based on market values of the assets under management. EIC's maximum annual fees for SMA accounts (charged quarterly) are 0.75%. Total fees charged may equal 3% per year. SMA schedules are provided by independent SMA sponsors and are available upon request from the individual sponsor. Further information about fees and compensation is discussed in EIC's form ADV Part 2 (www.adviserinfo.sec.gov).
