All-Cap Value SMA Composite Report

| <u>As of 12/31/2024</u> | 1 Year | 5 Year (annualized) | 10 Year (annualized) | Since Inception** (annualized) |
|--|--------|------------------------|-------------------------|-----------------------------------|
| Gross Rate of Return ¹ (Supplemental) | 13.0% | 12.4% | 9.8% | 11.8% |
| Assumed 3% Annual Fee Net Rate of Return ¹ | 9.7% | 9.1% | 6.6% | 8.5% |
| Benchmark Return of Russell 3000® Value Index | 14.0% | 8.6% | 8.4% | 10.3% |

Table Notes:

¹ Gross returns, presented as supplemental information, are “pure” gross and do not reflect the deduction of any expenses, including trading costs, for SMA accounts. Net returns are calculated by reducing gross returns with an assumed maximum annual SMA fee of 3.0%, applied monthly.

**Inception Date: January 1, 1986

Disclosures:

Equity Investment Corporation (EIC) is an SEC-registered, independent investment adviser incorporated in the state of Georgia. EIC has been providing investment advisory services to clients since 1986.

From January 1, 1986, through December 31, 1999, Jim Barksdale was primarily responsible for creating and achieving the performance results. Over that time period, the All-Cap Value SMA composite gained 14.4% (annualized) (11.1% net of an assumed maximum annual 3% fee), while the Russell 3000® Value Index rose 15.6% (annualized).

Andrew Bruner joined as the second member of EIC’s investment team in December 1999. From that point through the present day, portfolios have been managed using a team-based approach. Terry Irrgang became the third member of our investment team in April of 2003. Ian Zabor became the fourth member of our team, joining EIC in July of 2005. From January 1, 2000 through December 30, 2024, our investment team was responsible for the All-Cap Value SMA composite increasing by 10.3% (annualized) (7.1% net of an assumed maximum annual 3% fee); the Russell 3000 Value Index gained 7.5% (annualized).

Effective September 30, 2016, we implemented a succession plan to ensure the continuity and stability of our firm. In a transaction that closed on that date, a new investment adviser entity formed by Messrs. Bruner, Irrgang, and Zabor purchased substantially all of the assets and assumed all of the liabilities necessary for EIC’s continuous operation from Mr. Barksdale. That new registrant succeeded to all of EIC’s business. As planned, Mr. Barksdale’s tenure at EIC ended in August of 2019 when his transitional employment agreement expired. From the date of the succession through December 30, 2024, our investment team was responsible for the All-Cap Value SMA composite advancing by 11.6% (annualized) (8.3% net of an assumed maximum annual 3% fee), versus an 9.5% (annualized) increase for the Russell 3000 Value Index.

During all times after 1999, our investment team has been responsible for achieving the performance results shown in the tables.

Performance numbers (beginning July 1, 1995) are the value-weighted, time-weighted, total return composite results of fully discretionary All-Cap Value equity wrap fee (SMA) accounts. The strategy employs a flexible framework (not constrained by any cap size limitations) of investing in high-quality, well-managed companies, while at the same time avoiding those that look inexpensive relative to their historical record but are actually in structural decline. Prior to January 1, 2013, the composite was called the All-Cap Value Wrap Composite. Returns are generally presented net of foreign withholding taxes on dividends, interest income, and capital gains; however, returns for some accounts are presented gross of foreign taxes depending on the treatment by their custodian. Prior to July 1, 1995, the returns are that of the All-Cap Value composite. Results for the period January 1, 1989, through July 1, 1995, include both SMA and non-SMA accounts. During this period, SMA accounts represent on average 24% of the composite. Since July 1, 1995, SMA accounts comprise 100% of the composite. The composite creation date is July 1, 1995, and the inception date is January 1, 1986. All accounts included in the composite are managed according to similar investment guidelines. The benchmark index is the Russell 3000 Value Index (which excludes an advisory fee), and was chosen because it is representative of the composite’s investment style. The Russell 3000 Value Index measures the performance of the largest 3000 US companies in the value segment of the US equity universe. The Russell 3000 Value Index is based on the Russell 3000® Index, a market-capitalization weighted equity index representing approximately 98% of the investable US equity market.

Table Notes:

¹ *Gross returns, presented as supplemental information, are “pure” gross and do not reflect the deduction of any expenses, including trading costs, for SMA accounts. “Pure” gross returns from 10/1/02 through 12/31/06, reflect the deduction of trading costs but not any additional expenses. For the period 1/1/89 through 7/1/95, SMA accounts represent on average 24% of the composite assets. Prior to 7/1/95 and for the periods 10/1/02 through 12/31/06, the returns are that of EIC’s All-Cap Value composite. For all other periods, SMA accounts represent 100% of the composite assets. Net returns are calculated by reducing gross returns with an assumed maximum annual SMA fee of 3.0%, applied monthly.

² Dispersion is an asset-weighted standard deviation for the accounts in the composite for the entire year (or year-to-date) and is calculated using gross returns. “N/A” represents when dispersion is not statistically meaningful due to an insufficient number of portfolios in the composite for the entire year. For 1986 through 1995 dispersion represents EIC’s All-Cap Value composite, which contains both SMA and non-SMA accounts. For 1996 through 2005, dispersion represents EIC’s internally administered SMA accounts.

³ Number of Portfolios/Composite Assets significantly decreased in 2016 due to transitioning of a major SMA program to a model based (UMA) program during Q416.

⁴ “Total Assets” include our regulatory assets under management (“GIPS® Firm Assets”) and our advisory-only “UMA Assets”. EIC has no trading discretion for UMA accounts and provides a model portfolio to the program sponsor or overlay manager. The “UMA Assets” and “Total Assets” amounts are shown as supplemental information.

Additional Notes: The three year annualized standard deviation measures variability of the composite (gross of fees) and the benchmark returns over the preceding 36-month period.

Equity Investment Corporation

All-Cap Value SMA Composite Report

Disclosures (cont.):

Performance has been measured on a monthly basis from January 1, 1986, to present. Periods are geometrically linked to obtain the quarterly and annual results. Eligible new accounts are added to the composite at the beginning of the first full quarter under EIC management. Trade-date accounting with monthly valuations and adjustments for large cash flows are used. Results are based on fully discretionary accounts under management, including those accounts no longer with the firm. The US Dollar is the currency used to express performance. Returns include the reinvestment of all income. Economic and market conditions have differed over the time period displayed, and likewise will be different in the future. Policies for valuing investments, calculating performance and preparing GIPS Composite Reports are available upon request.

EIC claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. EIC has been independently verified for the periods January 1, 1986, through September 30, 2024. A firm that claims compliance with the GIPS standards must establish policies and procedures for complying with all the applicable requirements of the GIPS standards. Verification provides assurance on whether the firm's policies and procedures related to the composite and pooled fund maintenance, as well as the calculation, presentation, and distribution of performance, have been designed in compliance with the GIPS standards and have been implemented on a firm-wide basis. Verification does not provide assurance on the accuracy of any specific performance report. The verification reports, as well as a complete list and description of all the firm's composites, are available upon request by contacting Equity Investment Corporation, 1776 Peachtree Street NW, Suite 600S, Atlanta, GA 30309. The firm's list of broad distribution pooled funds is available upon request. Prospective clients should be aware that results are historical and do not imply future rates of return or volatility for EIC or the indices, which may be materially different from the past and from each other.

Investment management fees are based on market values of the assets under management. In addition to a management fee, some accounts pay an all-inclusive fee based on a percentage of assets under management. Other than brokerage commissions, this fee includes portfolio monitoring, consulting services, and in some cases, custodial services provided by a program sponsor. The assumed maximum fees for SMA accounts (charged quarterly) are 0.75%. Total fees charged may equal 3% per year (which is assumed to be equal to or higher than the highest actual SMA fee charged by a program sponsor). SMA schedules are provided by independent SMA sponsors and are available upon request from the individual sponsor. Further information about fees and compensation is discussed in EIC's form ADV Part 2 (www.adviserinfo.sec.gov).

Table Notes:

¹ Gross returns, presented as supplemental information, are “pure” gross and do not reflect the deduction of any expenses, including trading costs, for SMA accounts. Net returns are calculated by reducing gross returns by an assumed maximum annual SMA fee of 3.0% (0.75%/quarter during 2001 and 0.25%/month thereafter).

**Inception Date: January 1, 2001

Disclosures:

Equity Investment Corporation (EIC) is an SEC-registered, independent investment adviser incorporated in the state of Georgia. EIC has been providing investment advisory services to clients since 1986.

From January 1, 1986, through December 31, 1999, Jim Barksdale was primarily responsible for creating and achieving the performance results. Andrew Bruner joined as the second member of EIC’s investment team in December 1999. From that point through the present day, portfolios have been managed using a team-based approach. Terry Irrgang became the third member of our investment team in April of 2003. Ian Zabor became the fourth member of our team, joining EIC in July of 2005.

Effective September 30, 2016, we implemented a succession plan to ensure the continuity and stability of our firm. In a transaction that closed on that date, a new investment adviser entity formed by Messrs. Bruner, Irrgang, and Zabor purchased substantially all of the assets and assumed all of the liabilities necessary for EIC’s continuous operation from Mr. Barksdale. That new registrant succeeded to all of EIC’s business. As planned, Mr. Barksdale’s tenure at EIC ended in August of 2019 when his transitional employment agreement expired.

Our investment team has been responsible for achieving the performance results shown in the tables.

Performance numbers are the value-weighted, time-weighted, total return composite results of fully discretionary Large-Cap Value equity wrap fee (SMA) accounts managed in the style of the firm’s traditional value methodology with a large-cap bias. The strategy employs a flexible framework of investing in high-quality, well-managed companies, while at the same time avoiding those that look inexpensive relative to their historical record but are actually in structural decline. Prior to January 1, 2013, the composite was called the Large-Cap Value Wrap Composite. Returns are generally presented net of foreign withholding taxes on dividends, interest income, and capital gains; however, returns for some accounts are presented gross of foreign taxes depending on the treatment by their custodian. The composite creation and inception date is January 1, 2001, and SMA accounts comprise 100% of the composite. The benchmark index is the Russell 1000® Value Index (which excludes an advisory fee), and was chosen because it is representative of the composite’s investment style. The Russell 1000 Value Index measures the performance of the large-cap value segment of the US equity universe. It is a subset of the Russell 3000® Value Index and includes those Russell 1000® companies with lower price-to-book ratios and lower expected long-term mean earnings growth rates. The Russell 1000 represents approximately 90% of the investable US equity market.

Performance has been measured on a monthly basis from January 1, 2001, to present. Periods are geometrically linked to obtain the quarterly and annual results. Eligible new accounts are added to the composite at the beginning of the first full quarter under EIC management. Trade-date accounting with monthly valuations and adjustments for large cash flows are used. Results are based on fully discretionary accounts under management, including those accounts no longer with the firm. The US Dollar is the currency used to express performance. Returns include the reinvestment of all income. During 2002, 2% of the assets are non-fee paying accounts. There are no non-fee paying accounts during any other period. Economic and market conditions have differed over the time period displayed, and likewise will be different in the future. Policies for valuing investments, calculating performance and preparing GIPS Composite Reports are available upon request.

Table Notes:

¹*Gross returns, presented as supplemental information, are “pure” gross and do not reflect the deduction of any expenses, including trading costs, for SMA accounts. Net returns are calculated by reducing gross returns by an assumed maximum annual SMA fee of 3.0% (0.75%/quarter during 2001 and 0.25%/month thereafter).

²Dispersion is an asset-weighted standard deviation for the accounts in the composite the entire year (or year-to-date) and is calculated using gross returns. “N/A” represents when dispersion is not statistically meaningful due to an insufficient number of portfolios in the composite for the entire year.

³Number of Portfolios/Composite Assets significantly decreased in Q4 2014 and Q4 2016 due to transitioning of two major SMA programs to model based (UMA) programs.

⁴“Total Assets” include our regulatory assets under management (“GIPS® Firm Assets”) and our advisory-only “UMA Assets”. EIC has no trading discretion for UMA accounts and provides a model portfolio to the program sponsor or overlay manager. The “UMA Assets” and “Total Assets” amounts are shown as supplemental information.

Additional Note: The three year annualized standard deviation measures variability of the composite (gross of fees) and the benchmark returns over the preceding 36-month period.

Equity Investment Corporation

Large-Cap Value SMA Composite Report

Disclosures (cont.):

EIC claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. EIC has been independently verified for the periods January 1, 1986, through September 30, 2024. A firm that claims compliance with the GIPS standards must establish policies and procedures for complying with all the applicable requirements of the GIPS standards. Verification provides assurance on whether the firm's policies and procedures related to the composite and pooled fund maintenance, as well as the calculation, presentation, and distribution of performance, have been designed in compliance with the GIPS standards and have been implemented on a firm-wide basis. The Large-Cap Value SMA composite has had a performance examination for the periods January 1, 2001, through September 30, 2024. The verification and composite examination reports, as well as a complete list and description of the firm's composites, are available upon request by contacting Equity Investment Corporation, 1776 Peachtree Street NW, Suite 600S, Atlanta, GA 30309. The firm's list of broad distribution pooled funds is available upon request. Prospective clients should be aware that results are historical and do not imply future rates of return or volatility for EIC or the indices, which may be materially different from the past and from each other.

Investment management fees are based on market values of the assets under management. In addition to a management fee, some accounts pay an all-inclusive fee based on a percentage of assets under management. Other than brokerage commissions, this fee includes portfolio monitoring, consulting services, and in some cases, custodial services provided by a program sponsor. The assumed maximum fees for SMA accounts (charged quarterly) are 0.75%. Total fees charged may equal 3% per year (which is assumed to be equal to or higher than the highest actual SMA fee charged by a program sponsor). SMA schedules are provided by independent SMA sponsors and are available upon request from the individual sponsor. Further information about fees and compensation is discussed in EIC's form ADV Part 2 (www.adviserinfo.sec.gov).

**Inception Date: January 1, 2004

Disclosures:

Equity Investment Corporation (EIC) is an SEC-registered, independent investment adviser incorporated in the state of Georgia. EIC has been providing investment advisory services to clients since 1986.

From January 1, 1986, through December 31, 1999, Jim Barksdale was primarily responsible for creating and achieving the performance results. Andrew Bruner joined as the second member of EIC’s investment team in December 1999. From that point through the present day, portfolios have been managed using a team-based approach. Terry Irrgang became the third member of our investment team in April of 2003. Ian Zabor became the fourth member of our team, joining EIC in July of 2005.

Effective September 30, 2016, we implemented a succession plan to ensure the continuity and stability of our firm. In a transaction that closed on that date, a new investment adviser entity formed by Messrs. Bruner, Irrgang, and Zabor purchased substantially all of the assets and assumed all of the liabilities necessary for EIC’s continuous operation from Mr. Barksdale. That new registrant succeeded to all of EIC’s business. As planned, Mr. Barksdale’s tenure at EIC ended in August of 2019 when his transitional employment agreement expired.

Our investment team has been responsible for achieving the performance results shown in the tables.

Performance numbers are the value-weighted, time-weighted, total return composite results of fully discretionary Mid-Cap Value wrap (SMA) accounts. The strategy invests in high-quality, well-managed mid-cap companies, while at the same time avoiding those that look inexpensive relative to their historical record but are actually in structural decline. Prior to January 1, 2013, the composite was called the Mid-Cap Value Wrap Composite. Returns are generally presented net of foreign withholding taxes on dividends, interest income, and capital gains; however, returns for some accounts are presented gross of foreign taxes depending on the treatment by their custodian. All accounts included in the composite are managed according to similar investment guidelines. The composite creation and inception date is January 1, 2004, and SMA accounts comprise 100% of the composite. The benchmark index is the Russell Midcap® Value Index (which excludes an advisory fee), and was chosen because it is representative of the composite’s investment style. The Russell Midcap Value Index measures the performance of the mid-cap value segment of the US equity universe. It is a subset of the Russell Midcap® Index and includes approximately 800 of the Russell 1000® companies with lower price-to-book ratios and lower expected long-term mean earnings growth rates.

Performance has been measured on a monthly basis from January 1, 2004, to present. Periods are geometrically linked to obtain the quarterly and annual results. Eligible new accounts are added to the composite at the beginning of the first full quarter under EIC management. Trade-date accounting with monthly valuations and adjustments for large cash flows are used. Results are based on fully discretionary accounts under management, including those accounts no longer with the firm. The US Dollar is the currency used to express performance. Returns include the reinvestment of all income. There are no non-fee paying accounts. Economic and market conditions have differed over the time period displayed, and likewise will be different in the future. Policies for valuing investments, calculating performance and preparing GIPS Composite Reports are available upon request.
